

TRAFFIC IMPACTS ON EL CAMINO REAL NEAR HIGHWAY 85

STEVENS CREEK TRAIL CONSTRUCTION UPDATE NO. 7

Updated: October 5, 2007

Work continues on extending the Stevens Creek Trail in Mountain View from Yuba Drive to the south side of El Camino Real. This trail extension project includes the construction of a pedestrian/bicycle tunnel underneath El Camino Real in the vicinity of Highway 85 and the reconfiguration of the southbound Highway 85 on-ramp from eastbound El Camino Real. This work will impact traffic on El Camino Real.

Traffic lanes have been reconfigured on El Camino Real to create safe work zones while different segments of the tunnel are being constructed. During the nine-month tunnel construction period, El Camino Real will be reduced from three lanes to two lanes of traffic in each direction 24 hours a day.

Current Traffic Impacts

During the construction of the final section of the Stevens Creek Trail tunnel, a portion of eastbound El Camino Real will be reduced from three to two travel lanes. This lane configuration will remain in place for about three months and motorists should expect some minor delays. Pedestrian access along El Camino Real is currently open on both sides of El Camino Real.
